**2007 INTERLOCAL AGREEMENT FOR WATERFOWL (CANADA GOOSE)
MANAGEMENT PROGRAM**

WHEREAS, Chapter 39.34.040 RCW (Interlocal Cooperation Act) permits local government units to make the most efficient use of their powers by enabling them to cooperate with other localities on a basis of mutual advantage and thereby to provide services in a manner pursuant to forms of government organization that will accord best with recreational, park and natural resources and other factors influencing the needs and development of local communities and

WHEREAS, the various agencies, cities, counties, Washington State and agencies of the Federal Government listed in Exhibit A - Page 6 of this Agreement, desire to manage waterfowl, especially Canada Geese; and

WHEREAS, all parties require assistance from the Wildlife Services Program of the U.S. Department of Agriculture, to reduce negative impacts on water quality, minimize resource damage, ensure safety from disease for park visitors, and enhance other property managed; and

WHEREAS, information dating to a 1989 Waterfowl Research Project done by the University of Washington and current data indicates a large surplus of geese and other waterfowl species in the greater Seattle area; and

WHEREAS, this program will be an ongoing resource management activity attempting to maintain a manageable number of birds on a year-to-year basis; and

NOW, THEREFORE, in consideration of the covenants herein, it is mutually agreed as follows:

SECTION I - PURPOSE

The purpose of this Agreement is to provide joint funding for an egg addling program, lethal control, population monitoring and census; mainly of Canada Geese, within King and Snohomish Counties.

This program will assist each party in maintaining and managing public and selected and approved private sites that are impacted by a surplus of waterfowl.

SECTION II - SCOPE OF PROGRAM

Wildlife Services (WS) will receive funds from each participating member for the continuation of an egg addling program, lethal control and evaluation during spring and summer 2007.

Using best management practices WS will carry out an egg addling program, seeking as many accessible nesting areas as possible and will make every effort to minimize damage to the surrounding environment.

WS will also implement a program of "lethal control" as requested by the Waterfowl Management Committee, subject to the terms and conditions of a permit to be issued by the U.S. Fish and Wildlife Service. This will be done on a case by case basis in situations where an over population of Canada geese may result in an impact on human health and safety, such as potable water contamination, bird aircraft strikes, disease transmission or other situations as determined by WMC members.

To request lethal removal, WMC members must contact the WS District Supervisor or Assistant District Supervisor at 360-337-2778. WS will determine if removal is warranted and if the location is suitable for removal operations.

WS will provide an annual report to the members of the WMC which will include information regarding egg addling, the general location of nests and number of eggs added, number of geese removed, difficulties encountered and whatever other information would be valuable to the WMC.

2007 will be the fifteenth year of an egg addling program and the seventh year utilizing "lethal control". All methods and tools utilized to accomplish addling and "lethal control" activities in 2006 will again be used in 2007.

WS will conduct a standardized monthly goose population survey of selected area parks and will annually conduct up to six goose surveys of Lake Washington by boat. As in previous years, census counts will be expanded using staff from local agencies and participants at times and places to be specified. Survey results will be presented annually to the WMC.

Where possible, educational programs such as 'don't feed wildlife' and interpretive signage will be initiated to inform the public about urban Canada Geese, the associated problems, and the efforts of this committee at addressing those problems.

SECTION III - RESPONSIBILITIES

Each party, represented on the Waterfowl Management Committee, as shown on Exhibit "A", and incorporated by reference herein, will share in the ongoing review of the programs carried out by WS.

Each party agrees that if necessary, an Oversight Committee will be appointed to monitor and report back to the general committee on a regular basis. Three members of the Committee will make up the Oversight Committee chaired by the City of Seattle representative.

SECTION IV - COMPENSATION

The total cost of the 2007 waterfowl management program shall not exceed twenty four thousand, five hundred forty-five dollars (\$24, 545).

Each party shall contribute to the financial costs of the program as shown in Table I.

SECTION V - TERM AND EXTENSION

The Term of this Agreement is from January 1, 2007 to December 31, 2007. This Agreement may be extended in time, scope or funding by mutual written consent from all parties referenced herein.

SECTION VI - TERMINATION

This agreement may be unilaterally terminated by any of the parties referenced herein or Wildlife Services upon presentation of written notice to the Oversight Committee at least 30 days in advance of the severance date shown in Section V.

Should termination of this agreement occur without completion of the egg addling, each party shall pay only its' pro rata share of any expenses incurred under the agreement at the date of the termination, and each party shall receive copies of all products resulting from the addling activities up to the time of the termination.

SECTION VII - DELIVERABLE

Using best management practices Wildlife Services will carry out an egg addling program, seeking as many accessible nesting areas as possible and will make every effort to minimize damage to the surrounding environment. Field conditions or changing conditions may increase or decrease the number of eggs addled from previous years' totals. Eggs will be coated with vegetable oil on dates to be determined by USDA-Wildlife Services.

Lethal control will be implemented as requested and the total numbers are established by the U.S. Fish and Wildlife Service Permit.

Participants will receive a report on the number of eggs addled and geese euthanized in 2007.

SECTION VIII - FILING

As provided by RCW 39.34.040, this agreement shall be filed prior to its entry and force with the City or County Clerks of the participating parties, the County Auditor and the Secretary of State, and, if found to be necessary, with the State Office of Community Affairs as provided by RCW 39.34.120.

SECTION IX - LIABILITY

Each party to this agreement shall be responsible for damage to person or property resulting from the negligence on the part of itself, its employees, its agents or its officers. No party assumes any responsibility to another party for the consequences of any act or omission of any person, firm, or corporation not at party to this agreement.
