## **BUILDING PERMIT FEES**

### **Valuation**

Building permit fees are based on the valuation of the project. The Building Official determines the valuation of work for all permits. The valuation listed on the application is an estimate of the fair market value of construction including all labor and materials and may not be the same valuation determined by the Building Official during review.

The City estimates valuation using the August 2013 edition of the Building Valuation Data (BVD) Square Foot Construction Costs Table published by the "Building Safety Journal and gross square footage. The BVD table is based on new construction. The following percentages apply to the valuation of different work types, as described in the permit application scope of work:

- New construction, shell buildings, additions, etc.: 100% of BVD
- Alterations, repairs & equipment, change of use with minimal work: The valuation listed on the application shall be used concurrent with the approval by the Building Official
- Tenant Improvement, Interior Remodel: 20% of the BVD
- Garages, decks, porches, 100% of the "Utility, miscellaneous" rate in the BVD

Where the valuation provided by the applicant is higher than the BVD, the Building Official has the option to accept the provided valuation.

Use of the BVD is only an estimate. The Building Official determines the valuation of all work, and will consider alternatives calculation to the BVD method of valuation, such as actual contracts or bids for the work.
