BUILDING PERMITS

Valuation

Building permit fees are based on the valuation of the project. The Building Official determines the valuation of all work, and will consider alternatives calculation to the Building Valuation Data (BVD) method of valuation, such as actual contracts or bids for the work. The valuation listed on the application is an estimate of the fair market value of construction including all labor and materials and may not be the same valuation determined by the Building Official during review. Where the valuation provided by the applicant is higher than the BVD, the Building Official has the option to accept the provided valuation. Use of the BVD is only an estimate.

The City estimates valuation using the February 2015 edition of the BVD Square Foot Construction Costs Table published by the "Building Safety Journal" and gross square footage. The following percentages apply to the valuation of different work types:

- New construction, shell buildings, additions, etc.: 100% of BVD
- Alterations, repairs & equipment, change of use with minimal work: The valuation listed on the application shall be used concurrent with the approval by the Building Official
- Tenant Improvement, Interior Remodel: 20% of the BVD
- Garages, decks, porches, 100% of the "Utility, miscellaneous" rate in the BVD
