

CITY OF WOODINVILLE

Woodinville-Duvall Road Widening

INTRODUCTION / PURPOSE OF PROJECT

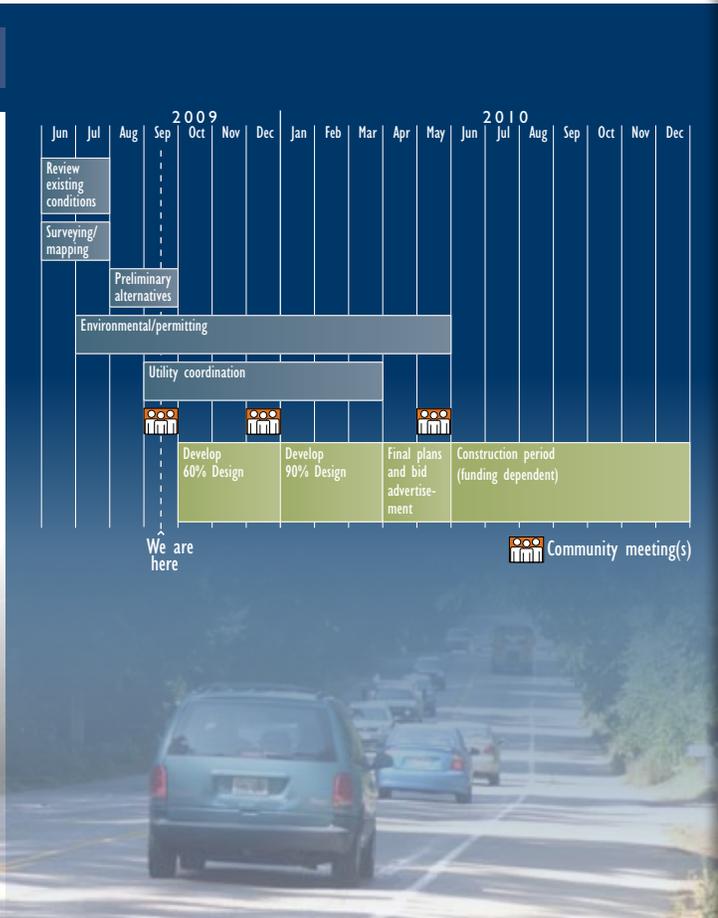

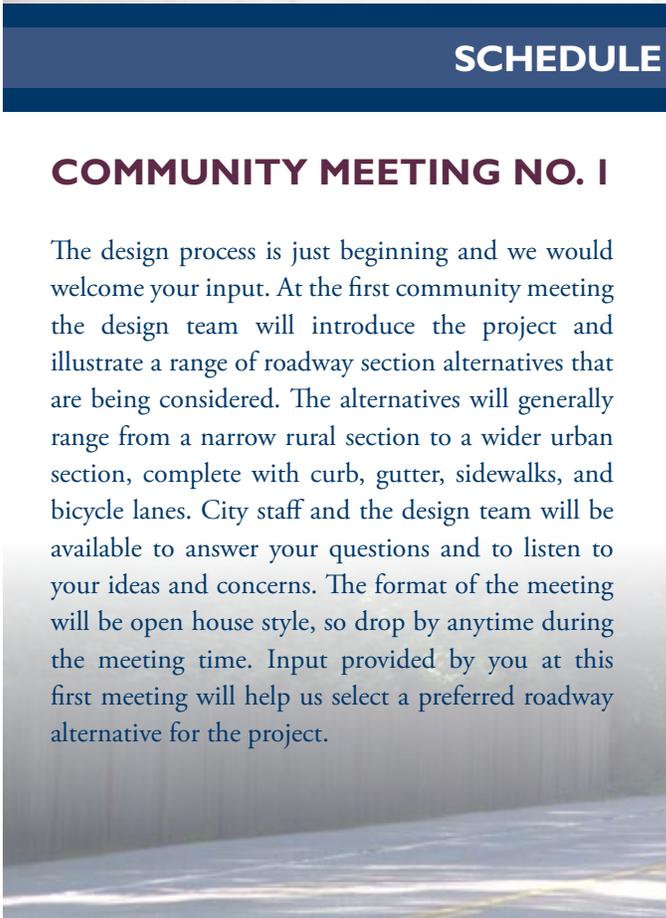

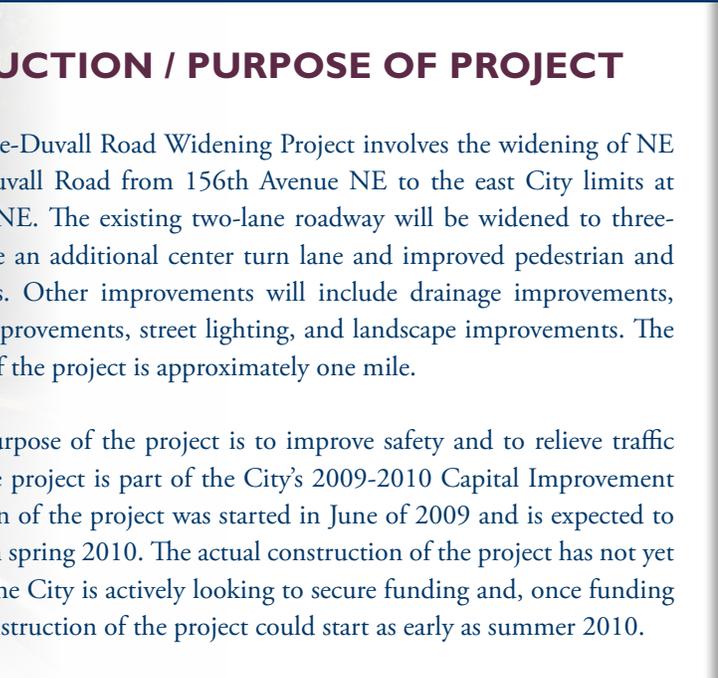

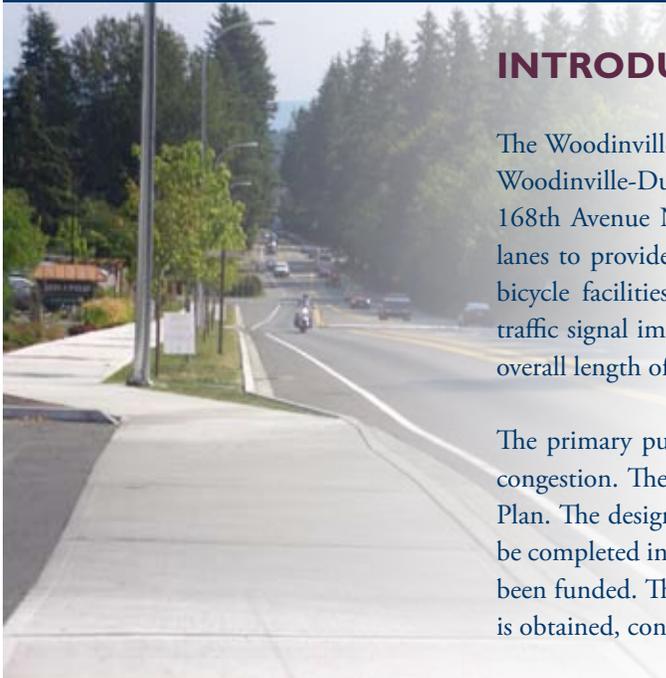

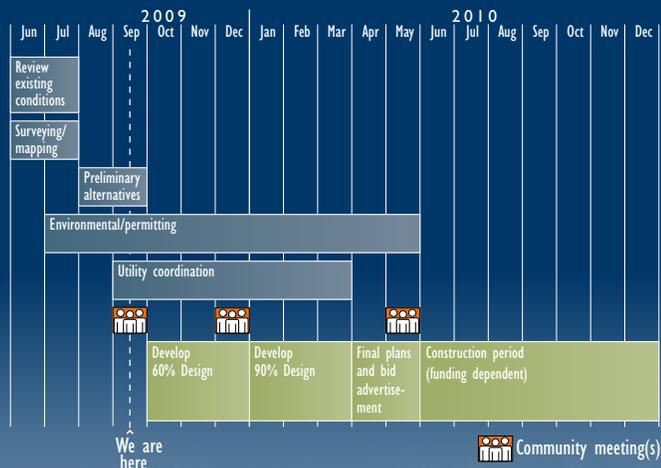

The Woodinville-Duvall Road Widening Project involves the widening of NE Woodinville-Duvall Road from 156th Avenue NE to the east City limits at 168th Avenue NE. The existing two-lane roadway will be widened to three-lanes to provide an additional center turn lane and improved pedestrian and bicycle facilities. Other improvements will include drainage improvements, traffic signal improvements, street lighting, and landscape improvements. The overall length of the project is approximately one mile.

The primary purpose of the project is to improve safety and to relieve traffic congestion. The project is part of the City's 2009-2010 Capital Improvement Plan. The design of the project was started in June of 2009 and is expected to be completed in spring 2010. The actual construction of the project has not yet been funded. The City is actively looking to secure funding and, once funding is obtained, construction of the project could start as early as summer 2010.

SCHEDULE

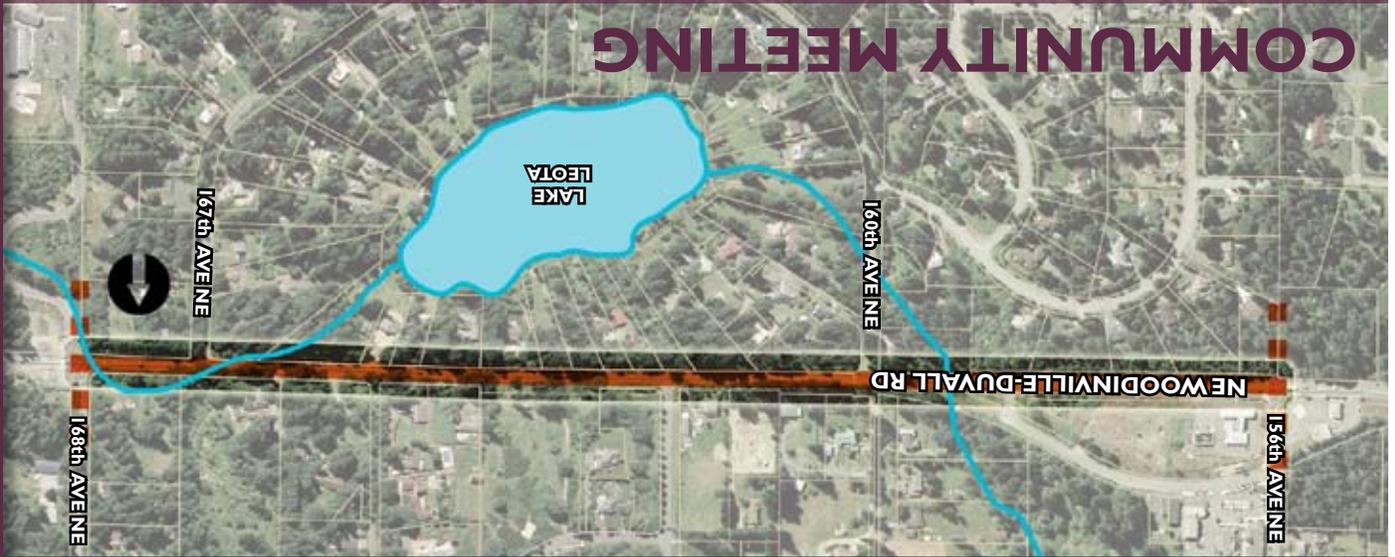

COMMUNITY MEETING NO. 1

The design process is just beginning and we would welcome your input. At the first community meeting the design team will introduce the project and illustrate a range of roadway section alternatives that are being considered. The alternatives will generally range from a narrow rural section to a wider urban section, complete with curb, gutter, sidewalks, and bicycle lanes. City staff and the design team will be available to answer your questions and to listen to your ideas and concerns. The format of the meeting will be open house style, so drop by anytime during the meeting time. Input provided by you at this first meeting will help us select a preferred roadway alternative for the project.

Date THURSDAY, SEPTEMBER 17, 2009
Time 6 PM TO 8 PM
Location WOODINVILLE, WA 98072
16501 NE 195TH ST
WELLINGTON ELEMENTARY SCHOOL GYMNASIUM
